

Resource: How to Authorize Non-Telnet, FTP, or HTTP Traffic on the CSACS

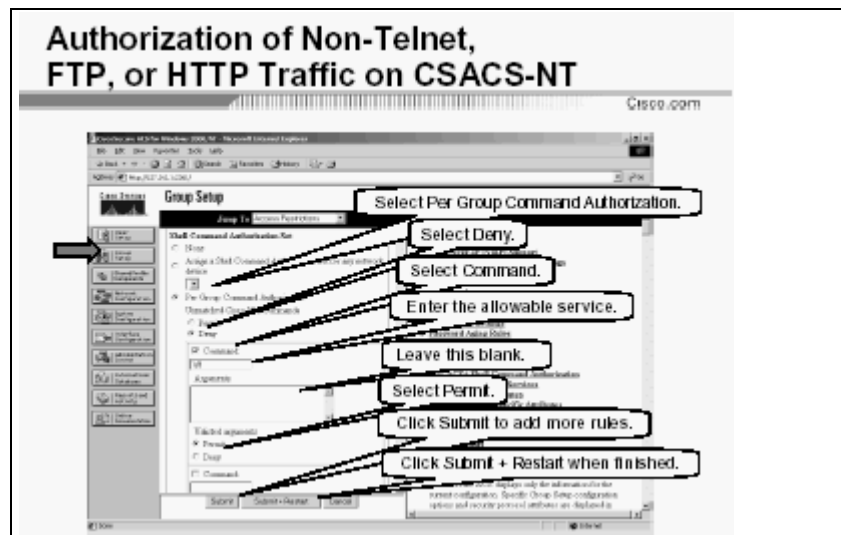

Figure 1

Complete the following steps to add authorization rules for specific non-telnet, FTP, or HTTP services in CSACS:

Step 1 Click **Group Setup** from the navigation bar. The Group Setup window opens.

Step 2 Scroll down in Group Setup until you find Shell Command Authorization Set.

Step 3 Select **Per Group Command Authorization**.

Step 4 Select **Deny**, which is found under Unmatched Cisco IOS commands.

Step 5 Select the **Command** check box.

Step 6 In the command field, enter an allowable service using the following format:

protocol/port

(where *protocol* = the protocol number, and *port* = the port number).

Step 7 Leave the Arguments field blank.

Step 8 Select **Permit**, which is found under Unlisted arguments.

Step 9 Click **Submit** to add more rules, or click **Submit + Restart** when finished.
