

Thanks for buying this widget.

INSTALLATION

This widget is a .muslib file. If you have Adobe Muse 7 or above installed double clicking on the file will open Muse and install the widget.

Once installed you will find the items in the "Library" panel in the Muse design view.

With the library item folder open drag the items onto you design and you are ready to go.

The library item will also install a set of colour chips and Graphic, Paragraph and possibly Character styles depending on which widget this is.

MODIFYING

To change the colours of this widget open the "Swatches" panel and right click on the colour you want to change.

Choose "Swatch Options" from the menu and then using the colour picker tool change the colour. Any element of the widget that uses that colour chip will be updated.

We use a naming convention for the colour chips used by our Snap widgets that are:

- Snap - Colour One
- Snap - Colour Two
- Snap - Colour Three
- Snap - Colour Four
- Snap - Colour Five

IMPORTANT PLEASE READ

Please note that if used with a non Snap enabled template or your own design the widget will retain the look and feel of its original design. However if the widget is used with a Snap enabled template then it will take on the look and feel of the Snap template automatically. These actions can not be overridden.
