# LIBRARY FILE / TOOLKIT INSTRUCTIONS

By MuseThemes.com

**We recommend that you delete old versions of our library files prior to importing the latest version.** Muse does not overwrite old versions and will add a duplicate numbered version to your library. We also optimize & bug-fix old widgets with each release, so it's always best to use our latest release.

REMOVING OLD TOOLS / WIDGETS

1. Open a new / existing Muse website.

2. Select your previously installed MuseThemes library files.

3. Click > **DELETE**

   (You can also export your old library file to save as a backup by clicking "Export as library")

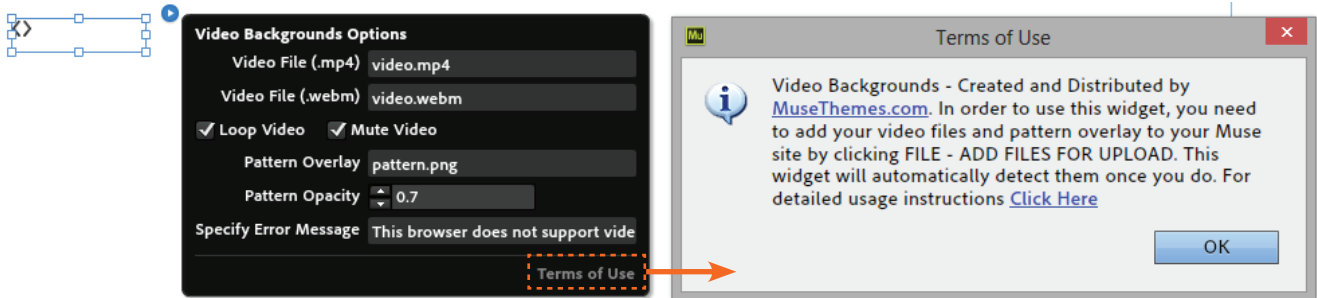

INSTALLING NEW LIBRARY FILES

1. Open the downloaded .zip

2. Double click the Toolbox Library File (.mulib)

3. Our complete library will automatically appear in your Adobe Muse "Library" panel. If the panel is not open, you can open it under the "Window" menu in Muse.

4. Drag / drop widgets or tools to the canvas as needed.

TOOLKIT INSTRUCTIONS INSIDE MUSE

Detailed usage instructions for each Toolkit item can be found by clicking the **"Terms of Use"** link on the widget options panel *(click the blue arrow beside the widget in Muse - shown below).*

Note - *Feature not available for design widgets (sliders, galleries, etc.)*

TERMS OF USE

Please note that all of our library files can only be used in Adobe Muse version 7 or later. Be sure to update your version of Adobe Muse before using our files.

All resources made available on MuseThemes.com, including but not limited to library files, icons, images, widgets, templates, layer styles, layered PSDs, patterns, textures, web elements and themes are made for use in both personal and commercial projects.

You are NOT permitted to make the resources found on MuseThemes available for distribution elsewhere without prior consent. Please help keep us in business by not sharing our files.
